

# DONINGTON & DRIVING DAYS

Action, adrenaline  
& fun for all

# F1 Ferrari Rally Mini Cooper JCB Diggers Single Seater Donington GP Circuit Caterhams Grand Prix Museum 4x4 Off Road Skid Cars Quad Biking Go Karts Donington

D&S Events has its permanent base at the Donington Park Grand Prix Circuit and as such has full use of all the superb facilities here. Everyone knows about the circuit but in addition there are full conference facilities, the Donington Grand Prix Museum, the Launch Pad and much more. Clearly all types of driving can be arranged from single seaters, Ferraris, Porsches, Caterhams and Mini Coopers to go karts, quad bikes and even JCB diggers! We also have a gravel Rally Stage and F1 and Rally Car simulators with the full 2010 Donington GP circuit uploaded. Whatever the budget and the numbers an adrenaline packed driving day can be arranged. A variety of on site catering starting with a full English breakfast and finishing with a Gala Dinner, complete with entertainment, can also be arranged, as can a simple buffet lunch or a BBQ and Hog Roast.

As well as huge amounts of tarmac we also have access to woodland and parkland and with a little imagination, a few marquees and the D&S Events creative team we can provide you or your company with anything from a Gift Experience to a Company Family Fun Day and from a Product Launch to a Sales Incentive Event.

Meeting rooms and conference facilities to fit all budgets and numbers are available and why not mix your serious business with a little afternoon/evening fun by adding some Country Pursuit style activities such as Laser Clays, Archery, 4x4 and Quad Biking.

Serious Driver Training is also on the menu with our Skid Cars, Emergency Reaction Training, Competitive Parking & Manoeuvring and wide variety of road safety related Driver Workshops. Serious 4x4 on and off road training is also supplied as is trailer towing.

## DONINGTON & DRIVING DAYS

Action, adrenaline & fun for all

**First class, well organized and friendly, informative instructors. A good opportunity to experience what a car can do under pressure – braking and steering and an opportunity to practice getting out of a skid – usually you just try to avoid hitting something. Very good – thanks**

Rob Farnworth, Screwfix
